#### Scientific Program

Day 1. 2017.9.14(Thu)

|             |                                 |               |
|-------------|---------------------------------|---------------|
| 18:00–20:00 | Welcome dinner for ATSC faculty | by invitation |
|-------------|---------------------------------|---------------|

Day 2. 2017.9.15(Fri)

| Time        | Title                                                                                                                                                                         | Name           | Nationality | Affiliation                                |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-------------|--------------------------------------------|
| 07:30–08:30 | KATSO faculty meeting with breakfast                                                                                                                                          | by invitation  |             |                                            |
| 08:30–09:00 | Registration                                                                                                                                                                  |                |             |                                            |
| 09:00–09:05 | Welcome address                                                                                                                                                               | Sanghoon Jheon | Korea       | Seoul National University Bundang Hospital |
| 09:05–09:50 | <b>Free oral presentation I</b><br><b>Moderator: Antonio B. Ramos, Lung Center of the Philippines, Philippines</b><br><b>Seok Whan Moon, Seoul St. Mary's Hospital, Korea</b> |                |             |                                            |
|             | 1. Robotic sleeve left upper lobectomy for endobronchial                                                                                                                      | Kamran Ali     | India       | Fortis Hospital, Vasant Kunj               |

|             |                                                                                                                                                                                    |                           |             |                                            |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-------------|--------------------------------------------|
|             | Inflammatory pseudotumor                                                                                                                                                           |                           |             |                                            |
|             | 2. Saline-filled cuff-punctured percutaneous dilatational tracheostomy                                                                                                             | Xu-Heng Chiang            | Taiwan      | National Taiwan University Hospital        |
|             | 3. Program of chronic thromboembolic pulmonary hypertension surgery by general thoracic surgeon                                                                                    | Dohyung Kim               | Korea       | Pusan national university Yangsan Hospital |
|             | 4. Salvage lung resection after curative-intent therapy for stage III or IV non-small cell lung cancer (NSCLC)                                                                     | Shinya Katsumata          | Japan       | National Cancer Center Hospital East       |
|             | 5. Lung volume reduction surgery in patients with heterogenous emphysema                                                                                                           | Nguyen Truong Giang       | Vietnam     | Vietnam Military Medical University        |
| 09:50–10:00 | Break                                                                                                                                                                              |                           |             |                                            |
| 10:00–10:45 | <b>Free oral presentation II</b><br><b>Moderator: Hisashi Saji, St. Marianna University School of Medicine, Japan</b><br><b>Punnarerk Thongcharoen, Siriraj Hospital, Thailand</b> |                           |             |                                            |
|             | 1. VATS for complex pulmonary aspergilloma                                                                                                                                         | Antonio B. Ramos          | Philippines | Lung Center of the Philippines             |
|             | 2. VATS rib resection                                                                                                                                                              | Tina Koh                  | Singapore   | National Cancer Centre                     |
|             | 3. Fluorescent image-guided lung resection: Electromagnetic navigational bronchoscopy-guided localization with ICG and lipiodol                                                    | Kook Nam Han              | Korea       | Korea University Guro Hospital             |
|             | 4. Complex tracheal/bronchial anastomosis by open thoracotomy: our technical knack and pitfall                                                                                     | Keiju Aokage              | Japan       | National Cancer Center Hospital East       |
|             | 5. The correlation between T2 visceral pleural involvement and positive N2, is there any clinical impact?                                                                          | Padungkiat Tangpiroontham | Thailand    | Bangkok Dusit Medical Center               |
| 10:45–11:00 | Break                                                                                                                                                                              |                           |             |                                            |

| Session 1. Future medicine in thoracic surgery<br>Moderator: Norihiko Ikeda, Tokyo Medical University Hospital, Japan<br>Jang Ming Lee, National Taiwan University Hospital, Taiwan   |                                                                                                                                                                  |                   |        |                                                            |
