

제15회

# 2023 대한흉부종양외과학회 추계학술대회

일 시 | 2023. 09. 15 (금) 09:30~17:45    장 소 | 힐튼호텔 경주, 그랜드볼룸

| Time          | Title                                                                                                                | 좌장 및 연자                                                      |
|---------------|----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| 09:30 - 10:00 | Registration and Opening                                                                                             | 이응배 (칠곡경북대병원)                                                |
| 10:00 - 11:00 | Abstract Presentation - 1                                                                                            | 이호석 (부산대병원), 성용원 (보라매병원)                                     |
| 11:00 - 12:00 | Abstract Presentation - 2                                                                                            | 송상윤 (화순전남대병원), 함석진 (아주대병원)                                   |
| 12:00 - 13:00 | Lunch                                                                                                                |                                                              |
| 13:00 - 14:40 | <b>Session I. Korean Research Group for Robotic Thoracic Surgery<br/>- KATSO joint session</b>                       | 김현구 (고려대구로병원), 김형렬 (서울아산병원)                                  |
| 13:00 - 13:25 | Evidence of robotic lung cancer surgery by NECA                                                                      | 윤재광 (서울아산병원)                                                 |
| 13:25 - 13:50 | Robot assisted subcostal thoracotomy                                                                                 | 정우현 (분당서울대병원)                                                |
| 13:50 - 14:15 | Preparing for Robotic Surgery<br>: Insights into the initial Surgeries and Ensuring Surgical stability               | 조정수 (부산대병원)                                                  |
| 14:15 - 14:40 | Early experiences of robotic thoracic surgery with SP system                                                         | 황상원 (삼성창원병원)                                                 |
| 14:40 - 15:00 | Break                                                                                                                |                                                              |
| 15:00 - 16:15 | <b>Session II. Paradigm changes in management of early lung cancer</b>                                               | 이응배 (칠곡경북대병원), 박인규 (서울대병원)                                   |
| 15:00 - 15:25 | Beyond segmentectomy<br>; Unsolved problems of surgery in early lung cancer                                          | 박샘이나 (서울대병원)                                                 |
| 15:25 - 15:50 | Radiation therapy<br>; can it replace the surgery in the future?                                                     | 윤홍인 (세브란스병원 방사선종양학과)                                         |
| 15:50 - 16:15 | Neoadjuvant therapy in early lung cancer                                                                             | 박세훈 (삼성서울병원 종양내과)                                            |
| 16:15 - 16:30 | Break                                                                                                                |                                                              |
| 16:30 - 17:45 | <b>Session III. TSTS - KATO joint session<br/>; future collaboration between Taiwan and Korea</b>                    | Yin-Kai Chao (Chang Gung memorial hospital),<br>김홍관 (삼성서울병원) |
| 16:30 - 16:55 | Step by step on the road to found Taiwan Society of Thoracic Surgeons (TSTS)<br>- role changes of a thoracic surgeon | Chung-Ping Hsu<br>(Hualien Tzu Chi Medical Center)           |
| 16:55 - 17:20 | General thoracic surgery in Taiwan<br>: Research hot spots and ongoing surgical trials                               | Yin-Kai Chao<br>(Chang Gung memorial hospital)               |
| 17:20 - 17:45 | Multi-Center Database Study on Thymic Epithelial Tumors in Korea                                                     | 강창현 (서울대병원)                                                  |
